Design Your Own Outdoor Dog Run!

An outdoor dog run can be a fun, safe place for your dog to spend some time playing in the fresh air. The grid below represents an aerial view of a yard. Each grid square is equal to one square foot. Your task is to design an outdoor dog run that is 100 square feet. Think about the height of the fencing. Think about length and width. Think about the size of the dog you are designing it for. Include spaces for trees, water bowls, shade, toys, and whatever else the dog would like. The dog run can be any shape you want – as long as it's 100 square feet in area. You can begin by outlining the shape of the run in one color, and then drawing the rest of your dog run features in other colors. Have fun and be creative!

IT CAN BE PLAIN

IT CAN BE FANCY

IT CAN BE ANY SHAPE
