## Color the Community Cats

**Community cats** are cats who live outdoors, mostly on their own. Community cats can include **feral** cats — cats that have little to no contact with humans — and **stray** cats — pet cats that have gotten lost or have been abandoned. These cats may need special help from caretakers who feed them and make sure they have surgery so they don't keep having kittens.

How many community cats do you see in this picture? Can you color all of them?
