Answers

1. **FALSE.** Wild hamsters will feed on fruits, seeds, and insects.
2. **FALSE.** Hamsters have poor vision and are nearsighted.
3. **TRUE.** They use those special cheeks as pouches to hoard food or while scavenging to bring back to their dens.
4. **TRUE.** Hamsters have large litters and can produce multiple litters in a year. For example, all Syrian hamsters are believed to have descended from just a single pair of hamsters in 1930!
5. **FALSE.** In captivity hamsters live about 2-3 years. Less so in the wild.
6. **TRUE.** Hamsters can learn their name, the sound of their owner's voices, even simple tricks!
